GROWtect Böschungsschutzgewebe aus Jute

Denomination of material : Jute Soil Saver Netting for Soil Stabilization made of 100 % natural fiber, biodegradable, to be installed on the soil surface to hold seeds, young plants during the establishment of vegetative cover. When it biodegrades it adds organic nutrition to the soil.
Made of 100 % natural spun jute fibers into yarns.

Fiber Type:	Tossa Jute
Weight:	500 g/m ²
Construction/threads:	porter: 6.5 (+/- 5 %) x shots 4.5 (+/- 6 %)/dm
Opening mesh size:	11 x 18 mm
Open area:	70–75 % approx
Sizes:	240 cm width x 50 m length
Packing:	on coreless rolls
Weight per roll:	60 Kgs
Warp count:	160 Lbs/spy
Weft count:	60 Lbs/spy
Tensile strength (warp):	160.00 Kgf
Tensile strength (weft):	45.00 Kgf
Oil content:	4–5 %
Moisture Regarin:	16–20 %
